

5, Picking Plums

Do you know “the plum” a Japanese fruit?

In our school, we grow plums, and pick plums with the teachers. A Japanese plum is very sour.

We make “a pickled plum” and will have plum juice. They are sour, but are very delicious. In our school, we sell the plum which we took to local people. The amount of plums is about 1ton every year.

Picking of plums is a very pleasant event.

6, ISO14001

Our school is an ISO14001 accredited school.

ISO is an environmental management system. Today, we do eco campus activities such as separation of garbage, energy saving, water conservation and so on.

In order to improve environmental problems such as global warming, I would like to act from what I can do.

7, World Gift

World Gift is a part of the contribution to society and we donate some goods to developing countries.

Our school is a member of the UNESCO associated school, we try to connect with the world.
